**Description of Minutes (a sample report of minutes is included later in this document)**  
The following sample agenda represents typical format and content of a board meeting minutes report. This sample should be customized to the particular culture and purpose of the organization. Note that board meeting minutes are very important. Minutes are considered legal documents by the auditors, IRS and courts, and they represent the actions of the board. Many assert that if it's not in the minutes, it didn't happen.

There is no standardized level of content and format for board minutes. In courts, as important as what you did is that you were reasonable when you did it. Therefore, sufficient information should be included to describe how board members reasonably came to reasonable decisions.

Include the name of the organization, date and time of meeting, who called it to order, who attended and if there a quorum, all motions made, any conflicts of interest or abstentions from voting, when the meeting ended and who developed the minutes.

The secretary of the board usually takes minutes during meetings. Written minutes are distributed to board members before each meeting for member's review. Minutes for the previous meeting should be reviewed right away in the next meeting. Any changes should be amended to the minutes and a new version submitted before the next meeting where the new version is reviewed to be accepted. Minutes should be retained in a manual and shared with all board members.
